

[GRAPHICAL SYMBOLS]

- 1) Example: Three switched positions, spring centred(3C) with spool type "2", ordering code "3C2".
- 2) Example: Two switched positions, no spring, with detent(2D) and spool type "2", ordering code "2D2".
- 3) Example: Two switched positions, spring offset(2B) with spool type "2" (reverse assembled), ordering code "2B2(L)".
- 4) The dotted line of graphical symbol(2B, 2D, 2N) represent the momentary switched position.

Three Switched Position	Graphical Symbol	Two Switched Position	Graphical Symbol	Two Switched Position	Graphical Symbol	Two Switched Position	Graphical Symbol
Spring Centred		No Spring		Spring Offset		No Spring-With Detent	
Model No: "3C"+ Spool Type		Model No: "2N"+ Spool Type		Model No: "2B"+ Spool Type		Model No: "2D"+ Spool Type	

Spool Type	Graphical Symbol	Physical Relationship (Neutral Position)	Spool SWG-02	Spool SWG-03	Remark
"2"					Holds pump pressure and cylinder position at neutral. Care should be paid if used as a 2-position type because shock occurs when each port is blocked in transit.
"3"					Pump can be unloaded and actuator is floating at neutral. If a 2-position type is used, shock is reduced as each port is released to tank in transit.
"4"					Pump pressure is held and actuator is floated at neutral. 2-position type is used when system pressure is required to be held in transit. Shock during transit is less compared to spool type "2".
"40"					In a variation of spool type "4", a restrictor is provided in A-T and B-T ports. Making it faster at stopping the actuator.
"5"					It can be used when a pump is unloading at neutral and actuator is halted at one way flow.
"60"					Pump is unloading and actuator position held at neutral. Suitable for series operation. Shock is reduced as each port is released to tank on transit.
"7"					Mainly used as a 2-position type. Shock is reduced on transit.
"8"					Pump pressure and cylinder position is held at neutral in the same way as spool type "2". It is used as 2 way type.
"85"					
"9"					Regenerative circuit is provided at neutral.
"10"					Prevent actuator from one direction drift by leakage of P port at neutral.
"11"					Half actuator movement positively at B. T ports blocked P.A port connected at neutral.
"12"					Prevent actuator from one direction drift by leakage of P port at neutral.

■ WITHIN CE MARKING REQUIREMENT

The apparatus meets the requirements of the following standards and hence fulfills the requirements of EMC Directive 89/336/EEC as amended by Directives 92/31/EEC and 93/68/EEC within CE marking requirement.

EN61000-6-3 : 2001+A11 : 2004 : CISPR 22 : 1997+A1:2000+A2 : 2002 Class B,
IEC61000-3-2 : 2000, modified
EN61000-3-3 :1994+A1:2001
EN61000-6-1 : 2001 : IEC61000-4-2 :1995+A1:1998+A2: 2000
IEC61000-4-3 : 2002, IEC61000-4-4 :2004
IEC61000-4-5 : 1995+A1:2000 IEC61000-4-6 :1996+A1:2000
IEC61000-4-8 : 1993+A1:2000 IEC61000-4-11:1994+A1:2000.

■ STABLE OPERATION

With a strong magnet and spring force, the valves are tough against contamination and thus ensure a stable operation. Under standard operation, the durability to 10 million spool shifts.(Average)

■ HIGH QUALITY & COMPETITIVE PRICE

All products are 100% tested by professional testing machinery. The material of tube is imported from Japan, and all parts are processed by professional specific automatic machinery. But the price is less 30% than leading brands.

■ EASY MAINTENANCE

Plug-in solenoid, all spools and bodies are interchangeable, the head of tube is design to hexnut to simplifying maintenance and reduce damage when assembl.

■ HIGH PERFORMANCE SWGH SERIES

High pressure(up to 35MPa), high flow rating, provides low pressure drop, with maximum performance. If need more details please consult our distributors.

■ CUSTOMIZATION

According to the requirement of customer to customize the product, and 100% satisfy their need.

30	DT04-2P Connector	06021614	1~2	06021614	1~2	06021614	1~2	06021614	1~2

- The value of "1~2" in the "QTY.", means that if the valve is single solenoid, it needs "1" unit, if the valve is double solenoid, it needs "2" units.
- The value of "06021614" in the "SWG-02-AC", means the part No. and CAD No., if you need the CAD file, please contact with SOLTECH.
- The spool type includes "2B2, 2B3, 3C2, 3C3...", please see the page 3 and 4.
- The coil include Alternate Current: AC 110V/50HZ, 220V/50HZ, 240V/50HZ or Direct Current: DC 12V, 24V...
- As for DIN CONNECTOR TYPE, the part No. of Coil(2-1) for SWG-02-DC is 05080404; for SWG-02-DC-S is 05080404S respectively.

LEAD WIRE CONNECTION AND DETAILS OF RECEPTACLE-"SWG-02 SERIES"

Type of Electrical Conduit Connection	Double Solenoid Type	Single Solenoid Type
Terminal Box Type		
Plug-in Connector Type		

- ★1. If you do not need the common plate, remove it.
 ★2. With DC solenoids, polarity is no question.

! DANGER !

- Do not perform wiring while the power is on. Doing so may result in electric shock, burns or death.
- Make the wiring properly. Improper wiring will cause an irregular movement of the machine, resulting in a grave accident.

ELECTRICAL CIRCUIT

Type of Electrical Conduit Connection	Electric Source		
	AC	DC	AC→DC Rectified
Terminal Box Type			
Plug-in Connector Type			

- Voltage-Surge Suppressor(Circuit composed in coil) is not added in standard design. if need please consult SOLTECH.

【INSTRUCTIONS】

※ MOUNTING : No-spring detented models not energized continuously must be installed so that the spool axis will be horizontal. Other models are not restricted to mounting horizontally.

※ ENERGIZATION : On double solenoid valves, do not energize both solenoids at the same time. Solenoid burn-out may occur.

※ VALVE TANK PORT : Avoid connection of the valve tank port to a line where surge pressure is likely to occur. Pipe end of tank line should be submerged in oil.

※ HYDRAULIC FLUID :

◎ Type of Fluid

- ★ Petroleum based fluids: Equivalent to ISO VG32 or 46.
- ★ Synthetic fluids: Phosphate ester or Polyol ester type.
- ★ Water Containing Fluids: Water-glycol fluids or W/O emulsion type.

◎ Recommended Viscosity and Temperature

- ★ Always be sure to use hydraulic fluids within the stipulated conditions as follows:
 Oil Temperature: 5 to 160 degrees F
 Viscosity: 77 to 1800 SSU

◎ Control of Contamination

- ★ Due caution must be used to maintain control over contamination of hydraulic fluids which may otherwise lead to breakdown and shorter valve life.
- ★ Please maintain the degrees of contamination between NAS 1638-Grade 12, Use 9.8 x 10 inch or filter line filter.
